

HEADER BAGS

Beacon produces custom packaging from hundreds of possible material combinations, creating specialized solutions for the most demanding applications. Let our technical team work with you to creatively meet your needs.

Visit our website at www.beaconconverters.com to learn more about our company and our products.

For packaging and sterilizing bulky devices or as a second barrier layer for trays, header bags can be just the right type of package for the job. Beacon header bags are custom made of a polymer film with the required degree of toughness, and a coated Dupont™ Tyvek® header strip for breathability. The films available include

coextrusions designed for strength and clarity, as well as cost-effective light gauge polyethylene for less demanding applications. We can manufacture header bags in custom sizes from 2 to 99 inches wide, and in lengths from 3 to 34 inches.

DuPont™ and Tyvek® are trademarks of DuPont.

Beacon header bags are custom made of polymer film with the required degree of toughness, and a coated Dupont™ Tyvek® header strip for breathability.
